

STC-Steyr[®] split roller bearings

Split bearings are particularly suitable for installation in inaccessible or enclosed locations.

The separation into smaller components simplifies lifting and handling operations as well as assembly and disassembly. With split bearings from STC-Steyr[®], downtimes caused by maintenance and repair work can be reduced.

Series 100

Lightweight series designed for higher operating speeds
Available in bore sizes from 75mm to 150mm

Series 01/01E

For applications with medium loads and a wide speed range
Available in bore sizes from 45mm to 105mm and 160mm to 300mm

Series 02/02E

For demanding applications with high radial and axial load capacity and a wide speed range
Available in bore sizes 160mm to 300mm

Series 03

Suitable for extreme load conditions
